

**JOHN-JOE SEEDO**

John-Joe Seedo – a very experienced Caller, active for many years, has decided to undertake a project. Initially, his plan was to create Digital copies of all of the Vinyl recordings that he owns, for his own use; John-Joe has several thousand records.

However, having mastered the skills necessary to be able to create these copies and – after having created digital copies of his own library – he has set himself the task of creating a “Complete Digital Library”, containing digital versions of EVERY tune that has ever been sold for use as a Square Dance accompaniment.

To achieve this, John-Joe has contacted all of his friends and asked to “borrow” their music, so as to “fill the gaps” in his own library. He has not made any form of contact with any Music Producers, Distributors, Wholesalers or Retailers.

After quite some time, he has now completed this task and has put together a library of 11, 324 different pieces of music, which (he believes) includes every piece of music.

Recognising that many Callers might be interested in what he has done – in particular newer Callers (possibly on limited funds), John Joe has now offered this library to anybody who would like a copy, on a “Free-Of-Charge” basis; all that you need do is to send three 16GB Memory Sticks (Flash Drives), together with an addressed “postage-paid” envelope and he will transfer the files to these devices and get them back to you as soon as he can.
